

The European Society for Environmental History (ESEH) is pleased to invite proposals for sessions, roundtables, papers, posters and other, more experimental forms of communicating scholarship for its 2013 biennial conference in Munich, Germany. The conference will be hosted and organized by the Rachel Carson Center for Environment and Society (RCC) and held at LMU Munich (LMU: Ludwig-Maximilians-Universität München) from 20-24 August 2013.

The conference is entitled 'Circulating Natures: Water-Food-Energy.' We wish, of course, to attract high-quality scholarship and to tap into intellectual energy-flows related to all aspects of the blooming field of environmental history. At the same time, we specifically encourage proposals related to 'Circulating Natures'. While always situated locally, nature also circulates regionally and globally through the movement of natural resources, products, people and non-human biota. What happens in – and comes from – one part of the world can have profound effects on other, often distant places. We wish to explore this theme of circulation – which is of basic importance to the multifaceted relationships of humans with the rest of nature at different times and in diverse places – with specific reference to the three, often interrelated, subjects of 'Water, Food, and Energy'.

For more information and the complete call for papers, please visit our website: www.eseh2013.org - Abstracts will be accepted between 15 May and 15 September 2012.
